

INTERTEK DIRECTORY OF BUILDING PRODUCTS

NxStar Systems Inc. – Factory Built Buildings

Company: NxStar Systems Inc.

CSA A277* Rated Factory Built Buildings

The prefabricated units constructed in one (or more) sections, are set onto the building's foundation and joined together at the building site. The factory built units are constructed at the NxStar Systems Inc. location in Kamloops, BC and transported to the intended building site. When completely assembled the units are equipped with all normal facilities to connect to municipal plumbing and electrical services. The prefabricated units constructed in one (or more) sections, are set onto the building's foundation and joined together at the building site.

The certification covers in-factory built prefabricated buildings, partially or fully enclosed modules, and panels for buildings of any occupancy.

The Intertek mark warrants an approved in-factory certification procedure, applicable to prefabricated buildings, modules, and panels, that complement the required on-site inspection and testing. Intertek mark also assures the proper fabrication at the plant and adherence to all necessary local codes including structural, plumbing, gas, heating and electrical services and intends to circumvent the necessity to inspect by local authorities the above mentioned services. The Intertek mark does not cover site connections to municipal services, other not certified units, or site mounting features.
